

PRESSEINFORMATION

Schwalm Robotic and Schwalm sewer rehabilitation impress with their comprehensive portfolio at IFAT 2018

The SCHWALM system “*in motion*”

(Bad Hersfeld, Mai 2018). From 14 -18 May 2018, it's that time again. The most important specialist trade fair for innovations, new products, and services in the fields of water, sewage, waste and raw materials management, the IFAT 2018, will get underway in Munich. Schwalm Robotic GmbH and Schwalm Kanalsanierung, Bad Hersfeld, are looking forward to presenting themselves to the IFAT trade fair visitors under the motto “in motion“, and to demonstrating why the complete spectrum of Schwalm products and services creates added value for its customers.

Give it a try and discover practice-oriented opportunities!

At the center of Schwalm's trade fair appearance are its current developments and the “moving” core competency fields surrounding the SCHWALM SYSTEM for partial trenchless sewer rehabilitation. In addition to specialist information provided by our sewer rehabilitation specialists, Schwalm also offers trade fair visitors the opportunity to get to know the advantages of our top-quality offer in a personal conversation at our 70m² stand in Hall C3.416. To this end, we have an internally-developed cutaway model of a box truck at your disposal which is clearly-visible and practice-oriented, and into which various modules of a sewer renovation vehicle have been built. Explicitly welcome: Give it a try and discover practice-oriented opportunities.

PRESSEINFORMATION

Experience value-adding products and services, made by Schwalm, at the IFAT 2018. The Schwalm trade fair team, already *"in motion"*, is eagerly looking forward to meeting you in person in Munich.
